BORIS TASEVSKI

FRONT-END DEVELOPER

Dynamic and results-driven professional with a proven track record in creating engaging content and developing websites and user interfaces for web and mobile applications, ensuring an outstanding user experience. Proficient in modern frontend technologies and programming languages. Passionate about staying abreast of the latest trends and techniques in web development to drive innovation and deliver optimal results.

WORK EXPERIENCE & PROJECTS

• Enterprise League · Full-time

Apr 2023 - Present

London, England, United Kingdom · Remote

Accomplished Front End Developer specializing in crafting sophisticated user interfaces for business collaboration platforms. Proven expertise in enhancing user experience and productivity through innovative design principles. Known for contributing to the evolution of robust business development platforms and collaborating effectively with cross-functional teams.

Key Achievements and Responsibilities:

Business Development Platform Expertise: Actively contribute to the evolution of a robust business development platform, utilizing expertise in Next and React to design and implement scalable, maintainable components.

Technology Stack Mastery: Demonstrate expertise in a diverse tech stack, including Gulp, Nunjucks, and other essential tools, ensuring seamless integration and optimal performance across multiple projects.

Redux and Saga Implementation: Implement state management solutions using Redux and Redux Saga, providing efficient data flow and enhancing the application's maintainability.

Project Collaboration: Collaborate cross-functionally with project managers, UX/UI designers, and backend developers to deliver high-quality, feature-rich applications that meet and exceed client expectations.

Innovation and Problem Solving: Proactively identify challenges and devise innovative solutions, fostering a culture of continuous improvement and efficiency.

Code Quality and Best Practices: Uphold coding standards, conduct code reviews, and enforce best practices to ensure the development of scalable, maintainable, and high-performance codebases.

Performance Optimization: Competent in utilizing Mouseflow to track user behavior and identify areas for application performance enhancement. Proficient in conducting performance audits using Lighthouse to assess website performance, accessibility, best practices, and SEO factors

Python Scripting: Innovate and contribute by developing Python scripts tailored to project requirements, adding versatility to our technological capabilities.

Google Chrome Extensions Development: Spearhead the creation of Google extensions tailored to the unique needs of the company, enhancing functionality and user experience.

Documentation: Showcase expertise in creating comprehensive documentation tailored to various project needs, ensuring clarity and support for ongoing and future development.

Agile Development: Contribute to an Agile development environment, participating in sprint planning, stand-ups, and retrospectives to optimize project delivery timelines.

- **Own Projects:**

Warehouse Management Solution App | Full-Stack Application

Developed with React, Node.js, and MongoDB.

Created a full-stack solution for managing inventory, orders, and real-time data updates. Utilized React for a responsive frontend, Node.js for backend functionality, and MongoDB for data storage, enhancing warehouse efficiency and operations.

Bikes E-commerce | Full Responsive Website

Developed using React.js, Typescript, and Ajax.

Designed and developed a full responsive e-commerce website specializing in bikes. Implemented the project using cutting-edge technologies, including React.js, Typescript, and Ajax, with a primary focus on intuitive filtering for an enhanced user experience.

Restaurant Website | Reservation Functionality

Adapted using React.js, Typescript, and Ajax.

Enhanced a restaurant website by incorporating React.js, Typescript, and Ajax to facilitate seamless scheduling for restaurant reservations. Implemented modern web technologies to improve user engagement and streamline the reservation process.

EDUCATION & CERTIFICATES

Front-end Development - Brainster Academy

Certificates:

- Front-end Development

MERN Stack Development - Semos Education Academy

Certificates:

- Programing in HTML5 with JavaScript and CSS3 - Certified 2022
- Node.js & MongoDB - Certified 2022
- React.js - Certified 2022
- Front-end MERN Stack Development - Certified 2022
- (MTA) Microsoft Technology Associate Certificate
Introduction to Programing Using HTML and CSS - Certified 2022
